Until a while back, Odin3 was only available for Windows PC That means if you own a Macbook or a linux computer, you may not be able to use Odin3 on the OS directly.. Users had installed a VMware to run Windows OS and then use Odin3 This thing has forbidden a number of MAC users from enjoying the open source nature of Android on their Galaxy Devices.. Samsung Odin is a free tool for PC and works with Windows only but you can use the Java Odin on Mac and Linux too.
